EXPERIENCE

Software Developer Intern
Nugget by Zomato *Aug 2026 – Present*

- Returned to Nugget with a larger scope, owning features end to end across the AI-driven customer support platform.
- Took on greater responsibility for designing, shipping, and maintaining production systems alongside full-time engineers.

Site Reliability Engineer Intern
Google *May 2026 – Jul 2026*

- Built AI-powered tooling for the SRE team to cut information toil for on-call & on-duty engineers during incidents.
- Focused on reducing mean time to respond (MTTR) by making incident context faster to gather.

Software Developer Intern
Nugget by Zomato *May 2025 – Aug 2025*

- Contributed to the Nugget team, improving AI-driven customer support systems for 20+ partner brands.
- Merged 110+ production PRs including features, bugs and enhancing observability metrics.

PROJECTS

Varuna: GitHub *Oct 2026*

- Built a fact-checker for Instagram reels that extracts claims from speech and on-screen text and verifies each against ranked sources with cited verdicts.
- FastAPI, MongoDB, Redis workers, and React + TypeScript in Docker, with claim-level caching to cut LLM costs.

Syncord: GitHub

- Built a CLI file sync and storage tool that uses Discord as encrypted storage, splitting files into 8 MB partitions with Fernet encryption over the Discord REST API.

VibeCheck: GitHub

- Python analytics engine that turns WhatsApp chat exports into reports on texting habits and emotions, combining statistics, sentiment analysis, and Llama 3.3 70B.

Reverse Turing: GitHub *Feb 2025*

- Deployed a social experiment platform with FastAPI, MongoDB, and Llama-70B-Instruct where 40+ participants guessed whether they were chatting with a human or an AI, with 0% downtime.

DECODE 4.0: GitHub *Oct 2024*

- Built the website for MUJ ACM's 24-hour online cryptic hunt (60+ participants) with Discord OAuth2, rate limiting, and a live leaderboard; 0% downtime.

DiscordLevelingCard: GitHub *Sept 2022*

- Python library that generates leveling-card images for Discord bots; 40+ GitHub stars and 40,000+ downloads.

Resbot & Reset API: GitHub *Jun 2021*

- Launched an anime and manga Discord bot serving 24,000+ users across 120 servers.
- Designed a FastAPI REST API for BDFD bot developers that handled 1M+ requests.

SKILLS

Programming Languages: Python, Go, C, C++, JavaScript, TypeScript, C#, Java; **Front-End:** React, HTML, CSS, Bootstrap, Tailwind CSS; **Back-End:** FastAPI, chi, Flask; **Databases:** MongoDB, Redis, SQL, Oracle DB, SQLite; **AI/ML:** Scikit-Learn, NumPy, Pandas, seaborn, MATLAB, Keras, PyTorch, Pillow, MCP; **Game Development and 3D:** Blender, Unity, Godot; **Development Tools:** Git, Postman, Docker, AWS, Grafana, Datadog, Figma.

CERTIFICATES

- **NPTEL Python DSA (Top 5%)**
- **Introduction to Java**
- **Introduction to Object-Oriented Programming with Java**
- **Object-Oriented Hierarchies in Java**
- **Python Data Structures**
- **GIT**

AWARDS

- **Third place in F1nalyze Datathon by IEEE CS MUJ**
- **First place in Ingenious Game Jam by Kothari**
- **First place in Code Virtuoso by VBPS**
- **Second place in Hackathon by Cambridge Noida**

EDUCATION

Manipal University Jaipur ***GPA: 8.76***
B.Tech in Computer Science and Engineering with specialization in AI & ML *Expected Graduation: Jun 2027*
